## PROJECTS

---

### CAR GAME

- Developed a car racing game with dynamic controls and obstacle avoidance, featuring a scoring system.
- Designed a progressive difficulty system with increasing car speed to enhance gameplay.
- Demonstrated strong game development skills and user engagement focus.
- Tech Stack Used:
  1. **HTML** to structure the core components of the game, including the game canvas and interface elements.
  2. **CSS** for designing and styling the game's layout, ensuring an attractive and user-friendly visual experience.
  3. **JavaScript** for implementing the game's logic, including car movement, speed control, collision detection, and player interaction.

### NIT kkr Website

- Developed a front-end clone of the NIT KKR college website using HTML, CSS, and JavaScript.
- Showcased proficiency in web technologies, including content structuring, styling, and interactivity, creating a visually appealing and functional clone.
- Tech Stack Used:
  1. Utilized **HTML** for building the core structural framework of the website, defining layout and content organization.
  2. Employed **CSS** for precise visual design and styling, replicating the original website's appearance.
  3. Leveraged **JavaScript** to add interactive elements and dynamic features for an authentic user experience similar to the NIT KKR website.

### MOVIE FLIX

- An entertainment app that allows users to discover popular, top-rated, and upcoming movies
- Users can explore movie details, including title, rating, runtime, and genres.
- Tech Stack Used:
  1. **React.js**, for the Client.
  2. **TMDB API** Utilized to fetch movie data, including popular, top-rated, and upcoming movies, as well as detailed movie information.
